## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-52 and 127 drawn to a boot with two lacing zones each with one lace and lace locks, classified in class 36, subclass 50.1.
  - II. Claims 53-75 and 127 drawn to a boot with lace guides and a release strap classified in class 36, subclass 52.
  - 1III. Claims 76-116 and 127 drawn to a boot with lace guides, classified in class 36, subclass 50.5.
  - IV. Claims 117-126, drawn to the method of using a boot with guides laces and lace locks, classified in class 12, subclass 142LC.
  - Claim 127 appears to be a linking claim and would be examined with the selected product as noted above.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions (I, II, III) and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of use of the invention can be used in lacing up gloves or any other laced material, i.e. corsets.
- 3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention II has a different operation than that of invention I since the strap on invention II is used to release at least

Application/Control Number: 10/732,834

Art Unit: 3728

one lace. The inventions are not capable of being used together because the one boot body cannot be placed upon another boot body with the multiple laces and locks.

- 4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention II has a different operation than that of invention III since the strap on invention II is used to release at least one lace. The inventions are not capable of being used together because the one boot body cannot be placed upon another boot body with the multiple laces and locks.
- 5. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, invention III has a different operation than that of invention I since the lace of invention III has a lock and the laces are not necessarily simultaneously securable. The inventions are not capable of being used together because the one boot body cannot be placed upon another boot body with the multiple laces and locks.
- 6. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.
- 7. A telephone call was made to Neil P. Ferraro on October 4, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3728

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37

CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Anthony Stashick whose telephone number is 571-272-4561. The examiner can normally

be reached on Monday through Thursday from 8:30 am until 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Mickey Yu can be reached on 571-272-4562. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained

from either Private PAIR or Public PAIR. Status information for unpublished applications is available

through Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
